A jury of elected representatives and business leaders

On Tuesday 14 April, the jury for the new cohort of the AMIF Lab met, comprising 12 members: mayors, elected representatives and representatives from AMIF's partner companies.

– **Karelle Mbobda-Kuate**, Vice-President of AMIF Partenaires, representative of Orange and Chair of the jury, outlined the day's task to the jury members: to select 11 start-ups from among the 20 candidates.
– **Rolin Cranoly**, mayor of Gagny (93), vice-president of AMIF in charge of the Ecological Transition and patron of the new cohort of the AMIF Lab, was a member of the jury.
– **Sarah Krief**, representative of Paris&Co, a partner of AMIF, was also a member of the jury.

Time’s up: three minutes to make the case

The start-ups had three minutes to present their projects: the innovative nature of their solutions, their benefits for local authorities… The presentations, which were both dynamic and varied, covered a wide range of topics.

3. Génépi Editions – A support solution for local authorities, offering practical guides developed in collaboration with residents based on their feedback, to help citizens at every stage of their lives.

4. Hormur – Hormur is a platform that facilitates cultural outreach by transforming

everyday spaces (homes, shops, businesses) into event venues.

5. HotRiver – HotRiver develops renewable energy solutions based on hydrothermal energy, harnessing the heat from rivers and lakes.

6. Ouicycle – Les Roues Solidaires – Ouicycle offers an inclusive active mobility solution for local authorities, facilitating travel and physical activity for older people and those with disabilities.

7. Purpl Solutions – Purpl offers modular, temporary and eco-designed street furniture to quickly activate public spaces without major works.

8. Sillant – Sillant offers an artificial intelligence solution dedicated to public procurement, enabling the automation of the analysis, comparison and evaluation of tenders.

9. Simul'Impact – Simul'Impact is a decision-support platform for local authorities, enabling the measurement and quantification of the economic, social and environmental impacts of public projects.

10. Tellux – Tellux offers a diagnostic solution for contaminated brownfield sites, enabling local authorities to better understand soil conditions prior to development projects.

11. WISP Solutions – WISP Solutions offers a solution based on AI and data from connected vehicles to optimise traffic light management without the need for heavy infrastructure.
